WEB DEVELOPMENT (INTRODUCTION)

PROJECT INTIATION AND PLANNING

1. FUTURE GREEN ALLIANCE

* HISTORY OF THE ORGANISATION

The Future Green Alliance (FGA) is a non-governmental organization that focuses on sustainable development and the environment. It was founded in response to the increasing environmental, social, and economic problems that communities are confronting. The organization was founded on the idea that community development and environmental preservation should coexist.

Since its founding, FGA has worked to advance conservation, youth involvement, climate resilience, sustainable livelihoods, environmental awareness, and community empowerment. Its method acknowledges the tight relationship between a healthy environment and public health, food security, economic opportunities, and the standard of living for both current and future generations.

The organization's growth is based on the shift to a greener economy and the expanding worldwide movement for sustainable development.

OUR MISSION AND MISSION

To empower local people to preserve and rebuild natural ecosystems for a healthier planet, encourage sustainable environmental practices, and increase understanding of climate change. To deliver services both financially and environmentally (Project Manager, 2022)

A society where people actively coexist with the environment, protecting biodiversity and natural resources for coming generations. To build a prosperous and sustainable South Africa where ecosystems, economies, and communities live in balance, propelled by conservation, renewable energy, and environmental justice for all. (Alam, 2024)

TARGET AND AUDIENCE

- Rural and semi-urban local communities

- Students and youth who are enthusiastic about environmental action
- Governmental organizations and policymakers
- Volunteers and activists for the environment
- Businesses seeking to form partnerships in sustainability

OPERATIONAL AREA

With intentions to spread to other ecologically fragile regions worldwide, the company will first operate in Africa (South Africa, Mozambique, Equatorial Guinea.

PROGRAMS AND ACTIVITIES

Reforestation Drives and Community tree planting

*To restore regions that have been cleared of trees, encourage locals to grow native plants.

EDUCATIONAL WORKSHOPS

*Educate people about waste management, climate change, and sustainable living in community centres and schools.

CLEAN UP CAMPAIGNS

*To cut down on pollution and plastic trash, plan frequent clean-up initiatives for the city, rivers, and shoreline.

SUSTAINABLE LIVELIHOOD TRAINING

*Educate people on recycling waste, eco-friendly farming, and other ways to make money.

POLICY ENGAGEMENT

Work together with regional administrations to impact environmental laws and policies.

YOUTH GREEN AMBASSADORS PROGRAM

Teach young volunteers to become community environmental activists.

DESIGN AND USER EXPERIENCE

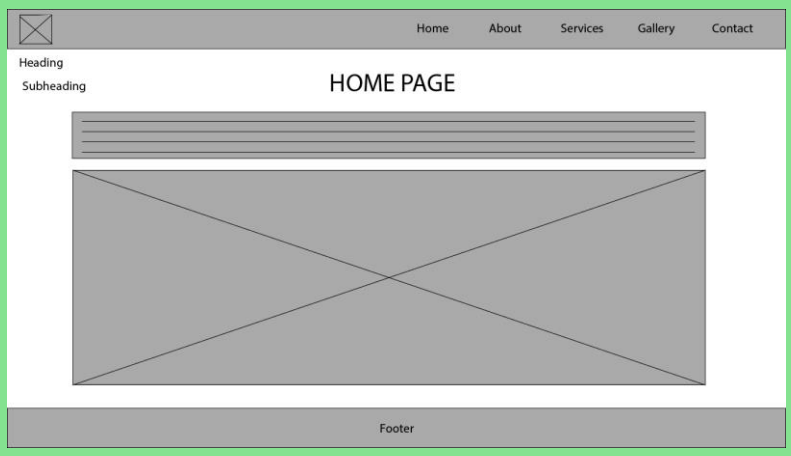

The design is simple and minimalistic to make for a great user experience. The buttons and various sections of the website are easy to see making it easy to navigate.

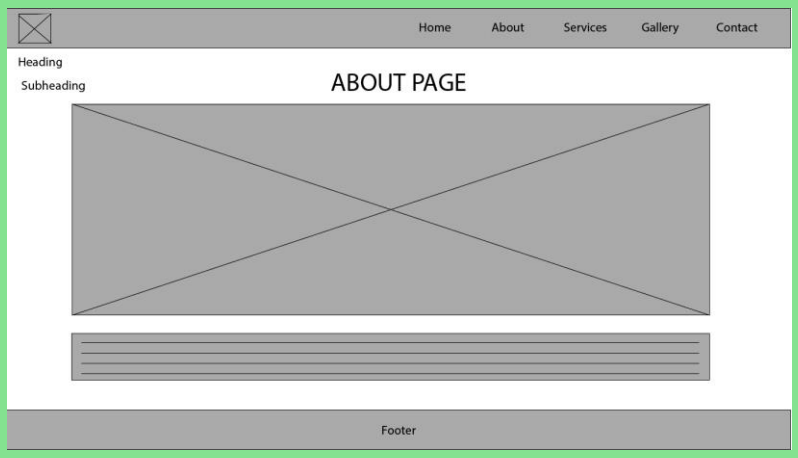

The company is all about recycling, so the chosen colour pallet is shades of green mixed with white to resonate with the green feel and nature of the company.

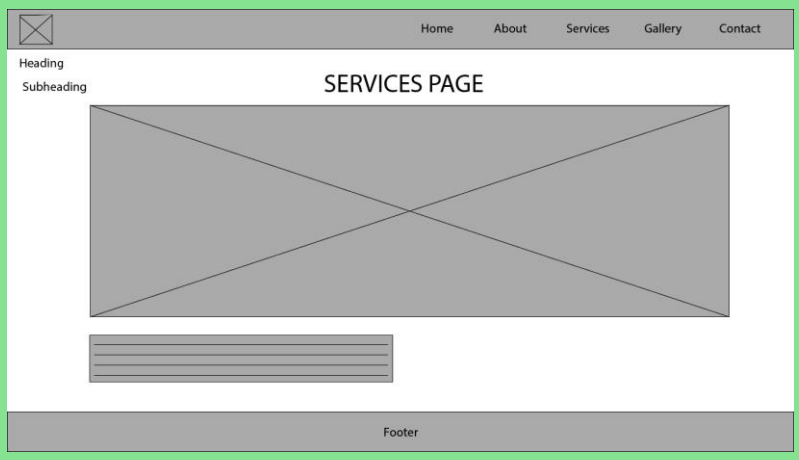

A combination of sarif and sans-serif fonts were used to create variotion while still making sure the typography is easy to see to align with the minimalistic approach I took when designing the website.

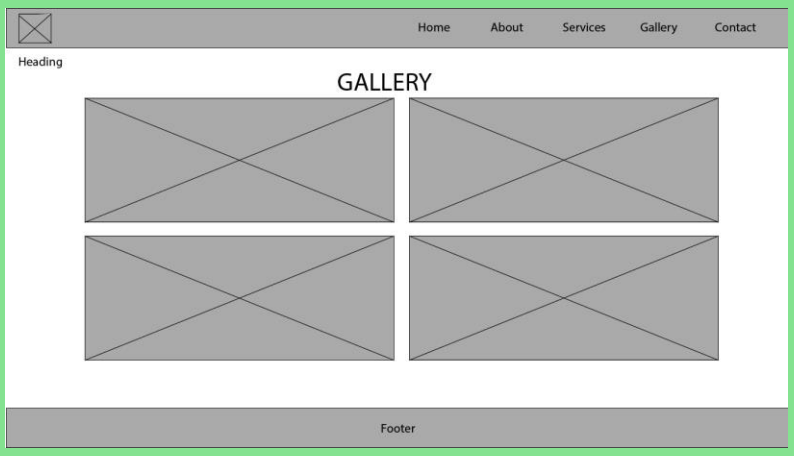

The navigation is placed at the top with headings on every page to allocate the different pages of the website making it easy to navigate.

STRUCTURE OF THE WEBSITE STRUCTURE

FUNDING PLAN

*Look for financial support from private donors, government grants, and global environmental foundations.

*Collaborate on CSR initiatives and sponsorships with environmentally minded companies.

*Host annual charity events, eco-marathons, and online crowdfunding campaigns.

*Sell branded eco-friendly products like reusable bags, bottles, and T-shirts.

*Provide optional memberships with perks like workshops, invites to events, and newsletters.

*To create a prosperous and sustainable South Africa driven by environmental justice for all, conservation, and renewable energy, where ecosystems, economies, and communities coexist in harmony.

Through advocacy, action, and education, the **FUTURE GREEN ALLIANCE** seeks to create resilient communities that place a high value on environmental stewardship. The NGO will inspire a global movement for environmental responsibility and contribute to a sustainable future by fusing strategic collaborations with grassroots participation.

BUGDET PLAN

Grants; R500000

Donations; R200000

Fundraising; R150000

Spornsership: 100000

Total; 950000

EXPENSE

SOURCE	AMOUNT
GRANTS	R500000
SPONSERS	R100000
DONATIONS	R200000

. Summary of Budget

Total Earnings: R880,000

Expenditure Total: R910,000

Shortfall: R30 000
